Six helpers, one family

Each helper is one soft blob with one silhouette twist. The twist is its Nigerian cue, and the eyes carry the personality. Hand-built vector only. Product UI is ink and cream, and orange means status, nothing else.

Helper	Cue built into the outline	Twist (signature move)	Tile colour
Order	akpata hawker tray as a flat dished crown	three oranges in the dish: wobble	marigold
Collector	abeti-aja fila: crown high and round on one side, cloth folded forward with its tip over the brow + white T-shirt nylon market bag (solid, two handles; final v6 bag at 83% so its weight matches the family)	folded tip flops and settles; bag swings with lag	cobalt
Credit	squarer jotter body, spiral bites down the spine	dog-eared page corner: flip	violet
Stock	provisions carton body, lid line, flap folded out	left flap: lifts like a lid	cocoa
Brand	town crier: the body is an agogo. Two bell cones fused under one round loop, small soft V at the base; one eye per bell	ting-ting: the loop rocks and the body strikes	bubblegum
Proof	a loupe in one eye ("send proof" of payment)	loupe: scans	mint

Construction grid and sizes

Spec	Value
Artboard	240 x 240 rig units
Baseline	y 222, shared (dashed)
Pivot	(120, 222), bottom centre (circle)
Body	Mimi v8 body x 0.8 = 141 x 118; squarer bodies keep its base curve
Head room	twist may rise to y 35
Second piece	k-prop: Collector bag only
Corner radius	18 units
Cut / gap	6 units, one width, at most one gap per accessory
Tilt	4 to 5 deg, alternating: -4 +5 -5 +4 -5 +5
Min size	24 px; below that use the Mimi mark
Sizes	24/32/48 UI, 96-160 cards, 300+ video

Eye spec

Mimi's plain oval, rx 8.5 / ry 11.5. Centres at x 97 and 143, y 166, identical on all six: this is the family glue. Each helper has a resting look of at most 5 units toward its twist. No capsule eyes, pupils, shine dots or outlines.

Eye expression set: 12 layers, shared

Order of the strip: idle, glance, happy, content, wink, determined, surprised, dizzy, error, excited, sleepy, heart. Each layer is `#k-expr-name` in the face group, and only one shows at a time. Idle carries the blink lids. Dizzy is the only stroked glyph. Rule: expressions change emotion, and the orange mark changes status.

States

State	Eyes	Orange mark	Body motion
idle	idle ovals, slow glance, blink	none	breathe
working	look down and to one side, quick saccades	dot, pulsing	small hops, squash on each land, signature move loops
waiting on owner	look up	ring, breathing	stretched up, slow sway
done	happy ^ ^	none	squash, pop up, land squash, wobble; twist jiggles

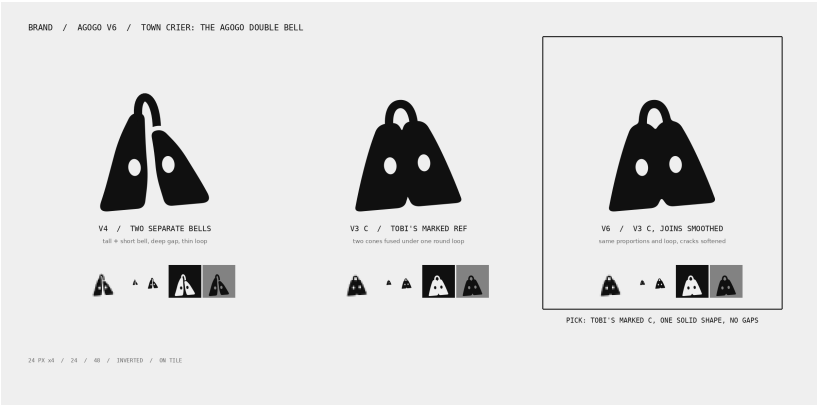

Colour

Product UI: ink #101010 on cream #F4EFE6 (or reversed). Cut-outs always take the surface colour. Orange #ee6018 is status only: a dot means working, a ring means waiting on the owner. It never fills a body, an eye or a twist. Family colours (illustration, app tiles, video, posters only): Order marigold #FF9E1B, Collector cobalt #1E7BFF, Credit violet #9B5CFF, Stock cocoa #99653A, Brand bubblegum #FF3D9A, Proof mint #14B8A6, Mimi tangerine #FF6414, spare stone #8C8A84. On a tile, the body is ink and the eyes take the tile colour.

Rig

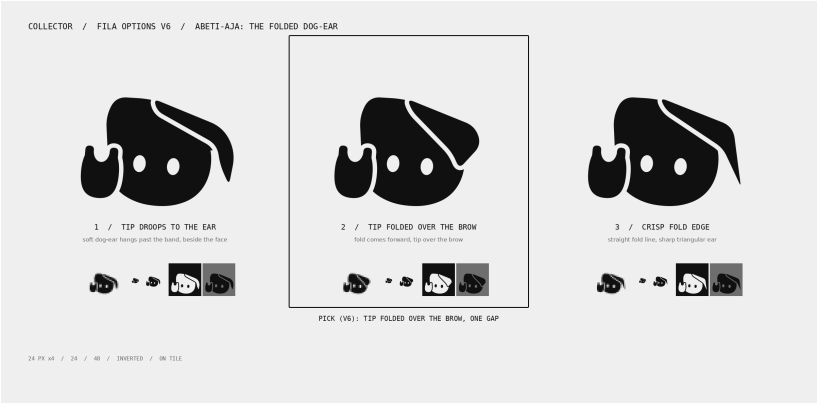

`k-root (pivot 120,222) > .rig-tilt > k-back, k-body, k-acc > k-part (hinge), k-face (120,166) > .rig-look > k-expr-* (12; idle holds k-eye-l / k-eye-r + .rig-lid), k-prop; k-status > k-dot, k-ring`. The same skeleton is used on all six. Animated groups carry no transform attribute and have a data-origin. There are no masks: cuts are surface-coloured shapes, so CSS or Lottie can move every part. k-prop has a data-origin (Collector's bag; empty on the others). v6 notes: Brand's twist part is the loop, hinged where it meets the bells (cv 120, 46); the strike rides on k-root. Collector's hinge is the top of the fold (cv 104, 10).

Brand: agogo (v6)

Picked v6: Tobi's marked v3 option C, kept to its proportions and loop. Only the joins are smoothed: the crack between the two cone tips is now a soft V (it is the floor of the loop hole), small fillets where the loop meets the shoulders, and a rounded V at the base. One solid shape, no gaps.

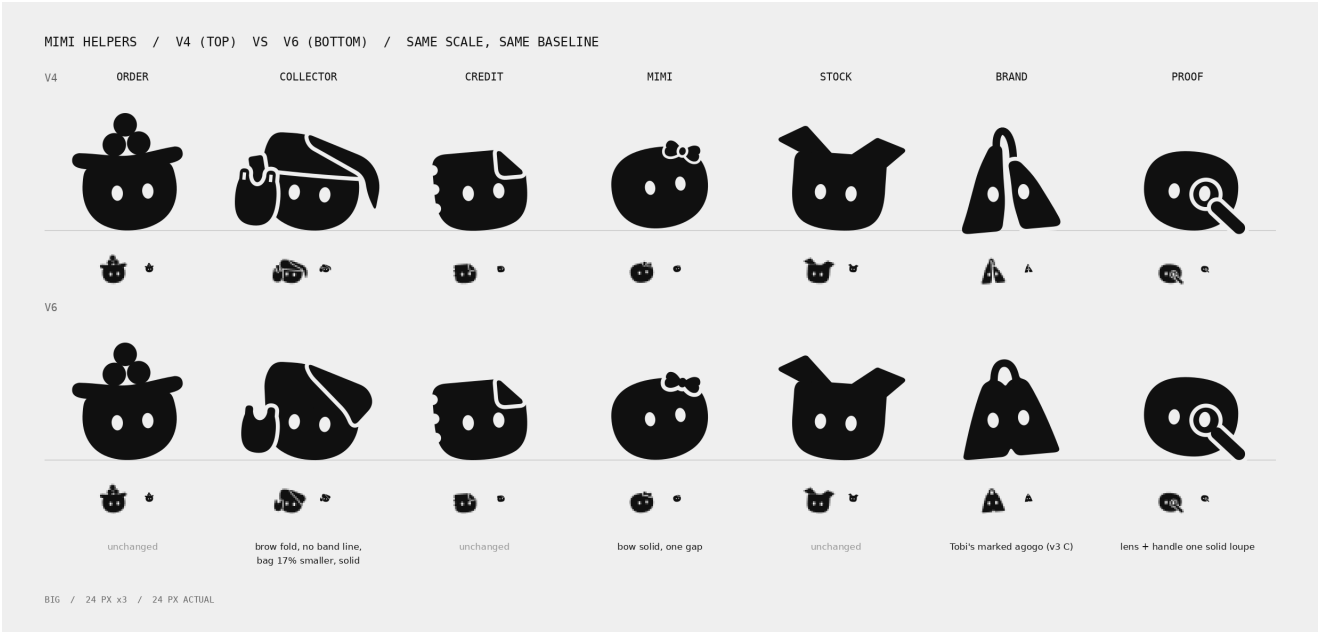

Collector: fila options (v6)

Picked 2: the tip folded over the brow (Tobi's choice). The fold's 6-unit cut is the fila's one gap; the v4 band line is gone, so the band reads in the outline only.

v6: v4 shapes, made solid

v6 starts from v4 and changes as little as possible. Order, Credit, Stock and Proof keep their v4 outlines. Mimi's bow is now one solid shape with one gap (no knot ring). Proof's lens and handle are one solid loupe with one continuous gap. Collector loses the band line, the handle slots and the tucked note, and takes the over-the-brow fold. Brand is Tobi's marked agogo. Top row v4, bottom row v6:

Consistency checklist (checks.txt)

```
MIMI HELPERS V6 / CONSISTENCY CHECKLIST
======================================================================
Yardstick: Tobi's refs (IMG_2735 blob trio, IMG_2740 sticker grid): one chunky solid
silhouette, one flat colour, no lines except the eyes, twist in the outline.

1. SOLID, NO PENCIL LINES  (idle pose source: FG strokes must be 0; cut shapes listed)
   order      FG strokes 0   halo strokes (gaps)  0   PASS
   collector  FG strokes 0   halo strokes (gaps)  2   PASS
   credit     FG strokes 0   halo strokes (gaps)  1   PASS
   stock      FG strokes 0   halo strokes (gaps)  0   PASS
   brand      FG strokes 0   halo strokes (gaps)  0   PASS
   proof      FG strokes 0   halo strokes (gaps)  0   PASS
   mimi       FG strokes 0   halo strokes (gaps)  3   PASS

2. AT MOST ONE GAP PER ACCESSORY  (separate cut regions inside the closed silhouette, eyes excluded)
   order      gaps 0   (none (oranges overlap the tray))   PASS
   collector  gaps 2   (fold edge on the fila, gap round the bag)   PASS
   credit     gaps 1   (page-corner fold)   PASS
   stock      gaps 0   (none)   PASS
   brand      gaps 0   (none (loop hole is a hole, not a gap))   PASS
   proof      gaps 1   (one continuous gap round lens + handle)   PASS
   mimi       gaps 1   (one gap round the whole bow)   PASS

3. ONE GAP WIDTH = 6 UNITS, ROUND ENDS  (width along each gap centre line, rig units)
   order      no gaps
   collector  p10  5.5   median  6.0   p90  6.1
   credit     p10  5.6   median  6.0   p90  6.0
   stock      no gaps
   brand      no gaps
   proof      p10  5.7   median  6.0   p90  6.1
   mimi       p10  4.2   median  5.8   p90  6.0   (bow gap is 6 canvas units at any Mimi scale; low p10 = taper where the bow leaves her outline)

4. EYES  same oval rx 8.5 / ry 11.5 on all six helpers, centres x 120 +/- 23, y 166 before tilt
   order      eye centres ( 97.1,166.5) (143.0,163.3)
```

```
   collector  eye centres ( 98.9,164.9) (144.7,169.0)
   credit     eye centres ( 96.1,166.9) (141.9,162.9)
   stock      eye centres ( 97.0,164.3) (142.9,167.5)
   brand      eye centres ( 92.2,168.2) (138.0,164.2)
   proof      eye centres (100.1,163.0) (145.9,167.0)
   band: all helper eye centres within y 162.9 .. 169.0 (6.1 units, the 4-5 deg tilts)
   mimi       parent mark keeps her own larger eyes (v8 geometry, unchanged)

5. BASELINE, HEIGHT, OPTICAL MASS  (rest pose render; target bottom y 222)
   order      bottom  222.2   top   46.3   height 175.8   width 165.8   ink area  17307
   collector  bottom  222.3   top   75.2   height 147.2   width 196.5   ink area  18516
   credit     bottom  222.2   top  101.5   height 120.7   width 142.3   ink area  13144
   stock      bottom  222.3   top   65.7   height 156.7   width 190.2   ink area  17470
   brand      bottom  222.2   top   71.5   height 150.7   width 143.7   ink area  12469
   proof      bottom  222.2   top   98.0   height 124.2   width 151.7   ink area  12679
   mimi       bottom  221.8   top   90.2   height 131.7   width 145.0   ink area  13853
   helper ink area spread 12469 .. 18516 (max/min 1.48)
   baseline PASS (all bottoms 222 +/- 0.3 px antialias). Mass: v4 shapes kept; final v6 shrinks only Collector's
   nylon bag to 83% (same shape, handles, hip position, one gap) to pull its weight toward the family.

6. 24 PX ICON READ  (black on cream; eye pixels must stay lighter than the body)
   order      eye pixels 255 / 255 (0 ink .. 255 paper)   solid body pixels 148   PASS
   collector  eye pixels 237 / 255 (0 ink .. 255 paper)   solid body pixels 154   PASS
   credit     eye pixels 255 / 249 (0 ink .. 255 paper)   solid body pixels 112   PASS
   stock      eye pixels 255 / 255 (0 ink .. 255 paper)   solid body pixels 155   PASS
   brand      eye pixels 252 / 212 (0 ink .. 255 paper)   solid body pixels 107   PASS
   proof      eye pixels 136 / 255 (0 ink .. 255 paper)   solid body pixels 102   PASS

7. SHAPE LANGUAGE  (source review)
   corner radius   v4 bodies untouched (R 18 family); new v6 geometry: fila brow fold 22.5 Mimi units = 18 rig,
                   tip 12 Mimi = ~10 rig; Brand outer corners 12-16, base V tip rounded, loop joins filleted
   gap ends        every gap is a round-joined halo (stroke-linejoin round) or a circle: no square ends
   colours         INK #101010 / CREAM #F4EFE6 / ORANGE #ee6018 status only / v4 family colours unchanged
   kept exactly    Order oranges (3 balls) + tray, Stock body + both flaps, Credit body + bites + page corner,
                   Proof body + loupe lens/handle sizes, Mimi body + bow loops (v4 path data unchanged)
```

Motion tokens

Factory feel: quick, mechanical, a little squishy. One data source drives motion.html and the lineup video.

Easing	Curve	Use
`mech`	cubic-bezier(0.4, 0.0, 0.2, 1.0)	eyes, blinks, UI
`out`	cubic-bezier(0.2, 0.7, 0.2, 1.0)	hops, pops, settles
`inout`	cubic-bezier(0.45, 0.0, 0.55, 1.0)	breathe, sway, twist moves
`spring`	cubic-bezier(0.34, 1.56, 0.64, 1.0)	one-off UI pops
`snap`	cubic-bezier(0.7, 0.0, 0.84, 0.0)	falling into a land
`lin`	cubic-bezier(0.0, 0.0, 1.0, 1.0)	densely sampled composite (Brand root)

Duration	ms
`blink`	4200
`blink close`	120
`breathe`	3200
`glance cycle`	6400
`work bounce`	640
`work eyes`	1280
`work sig`	1280
`wait sway`	2400
`ring pulse`	1600
`dot pulse`	960
`done pop`	900
`idle sig`	5600
`stagger`	137

Amplitude	value
breathe	+2.5% h / -1.2% w
hop	7 units
land squash / stretch	8% / 6%
done pop	22 units, 12% squash
sway	2.5 deg
glance / eyes up	5 / 8 units
twist jiggle	9 deg (Collector 5: long lever), damped over 5 swings
squash ceiling	12%, keep area roughly constant

Principles

Squash on land, stretch on take-off, feet stay on the pivot. The twist always lags the body (secondary motion). Each helper has one signature move: Order's oranges wobble, Collector's folded fila tip flops and settles while the nylon bag swings a beat behind, Credit's page corner flips, Stock's flap lifts like a lid, Brand's agogo goes ting-ting (the loop rocks while the body strikes), Proof's loupe scans. The orange marks pulse but never bounce. Helpers are staggered by 137 ms so a roster never moves in lockstep. Reduced motion: all loops stop, and each state becomes a still pose of eye position, expression and orange mark.

Do / Don't

Do	Don't
one twist per helper, built into the outline	extra props, hands or tools stuck on the head
identical eyes: size, spacing, height	capsule eyes, pupils, shine dots
cut colour = surface colour	outlines, inner lines, gradients, textures
orange only for status, one mark at a time	orange bodies in product UI, or two marks
check every new pose at 24 px	squash past 12%, or bounce the status mark
let the twist lag the body	big pops inside dense lists

Where they are used

Surface	Form	Notes
Owner screen roster	32 to 48 px, ink/cream, live status	only the status mark and the glance animate
Approval cards	48 to 64 px, waiting state (ring)	eyes up at the owner; the card holds the decision
Empty states	120 to 160 px, idle or sleepy	signature move on first view or hover
Video	300 px and up, full motion, family colours allowed	lineup cycling states; done pops for wins
Posters	big, mono or family colours, stickers	few words, plain language
App tiles / stickers	family colour tiles, die-cut stickers	tiles.png, stickers.png
